

Ecosystems Project

Select an ecosystem of your choice! It could be a tropical rainforest, a desert, tundra, ocean, grassland etc!

Research:

- The habitats within the ecosystem ○
- The biotic factors (so plants and animals that live there) ○
- The abiotic factors (so start with the climate!) ○

Extend:

- How do the abiotic factors influence the living things? ○
- What adaptations do the living things have to aid them in their survival? ○

Present your work as a project booklet. You will need to define key words before you use them!
